

# Conflict Forecast: Niger

Target Month: September 2026

## Section 1

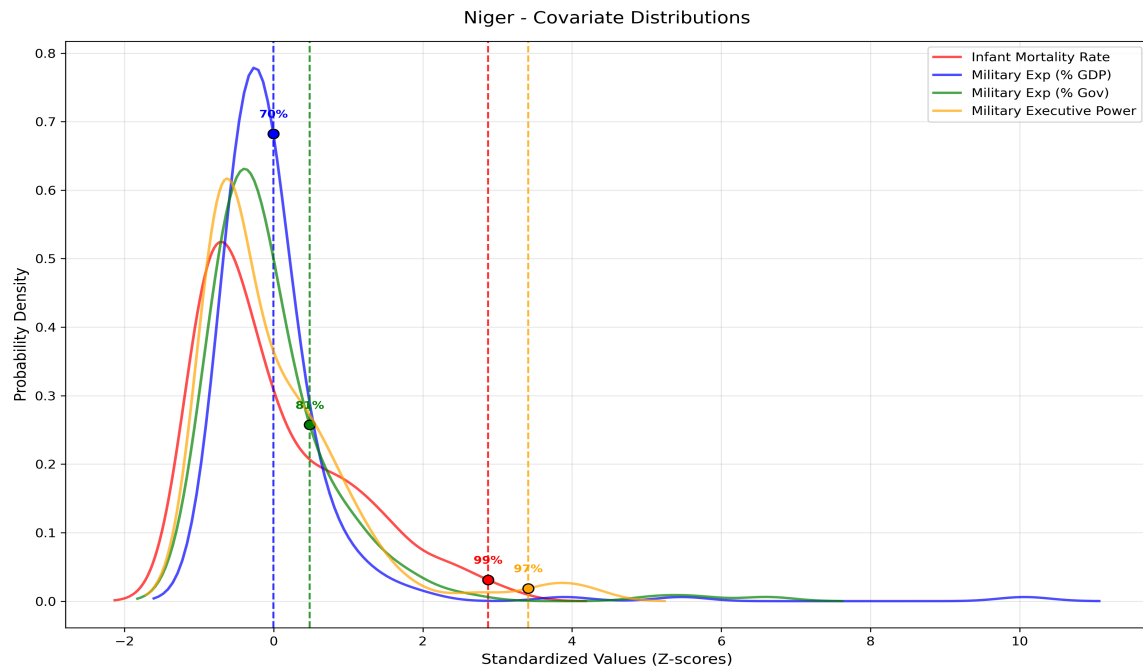

This figure shows the historical trend for September fatalities over the past 5 years, with our forecast for September 2026 highlighted. The other forecast months are shown for additional context. Global and cohort averages provide comparative context.

Our forecast for September 2026 (90 fatalities) is significantly higher than the 5-year historical average (47 fatalities).

## Section 2

This figure shows where the target country sits within the global distribution for key covariates. Each colored curve represents the probability density of a covariate across all countries, with the target country's position marked by a vertical line.

Country profile: Infant Mortality Rate: very high (99th percentile); Military Exp (% GDP): high (70th percentile); Military Exp (% Gov): very high (81th percentile); Military Executive Power: very high (97th percentile).

### Section 3

This figure shows the global distribution of conflict forecasts for September 2026, with countries positioned by their probability of experiencing  $\geq 25$  fatalities (x-axis, symlog scale) and predicted fatalities (y-axis, symlog scale). The target country is highlighted with a prominent marker.

For September 2026, Niger is forecasted with 1.000 probability of  $\geq 25$  fatalities (100th percentile) and 90.4 predicted fatalities (97th percentile). Risk category: Near-certain conflict; Intensity category: 11-100.
