

Conflict Forecast: Somalia

Target Month: December 2025

Section 1

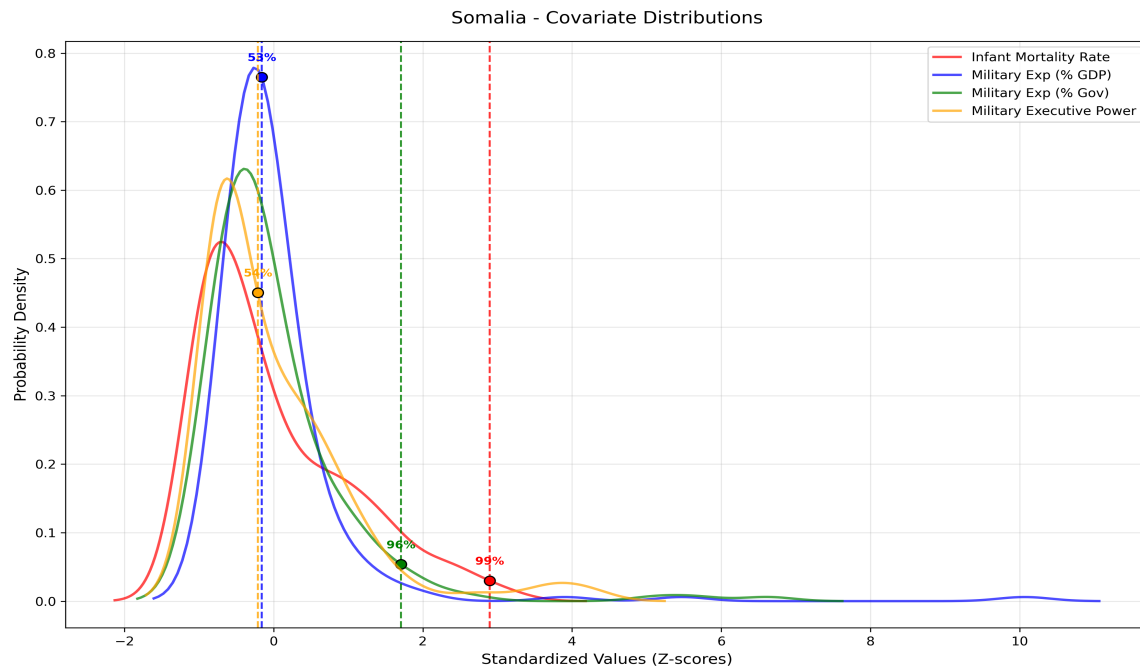

This figure shows the historical trend for December fatalities over the past 5 years, with our forecast for December 2025 highlighted. The other forecast months are shown for additional context.

Our forecast for December 2025 (124 fatalities) is moderately lower than the 5-year historical average (171 fatalities).

Section 2

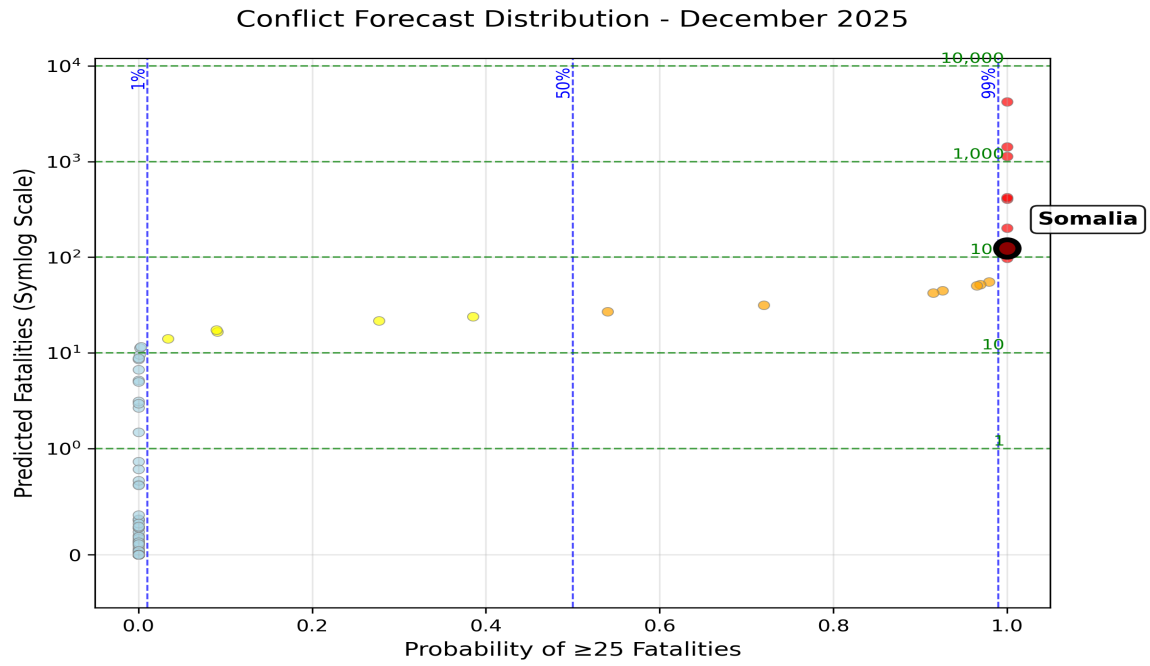

This figure shows where the target country sits within the global distribution for key covariates. Each colored curve represents the probability density of a covariate across all countries, with the target country's position marked by a vertical line.

Country profile: Infant Mortality Rate: very high (99th percentile); Military Exp (% GDP): moderate (53th percentile); Military Exp (% Gov): very high (96th percentile); Military Executive Power: moderate (54th percentile).

Section 3

This figure shows the global distribution of conflict forecasts for December 2025, with countries positioned by their probability of experiencing ≥ 25 fatalities (x-axis) and predicted fatalities (y-axis, symlog scale). The target country is highlighted with a prominent marker.

For December 2025, Somalia is forecasted with 1.000 probability of ≥ 25 fatalities (100th percentile) and 124.3 predicted fatalities (96th percentile). Risk category: Near-certain conflict; Intensity category: 101-1,000.
