

Conflict Forecast: India

Target Month: September 2026

Section 1

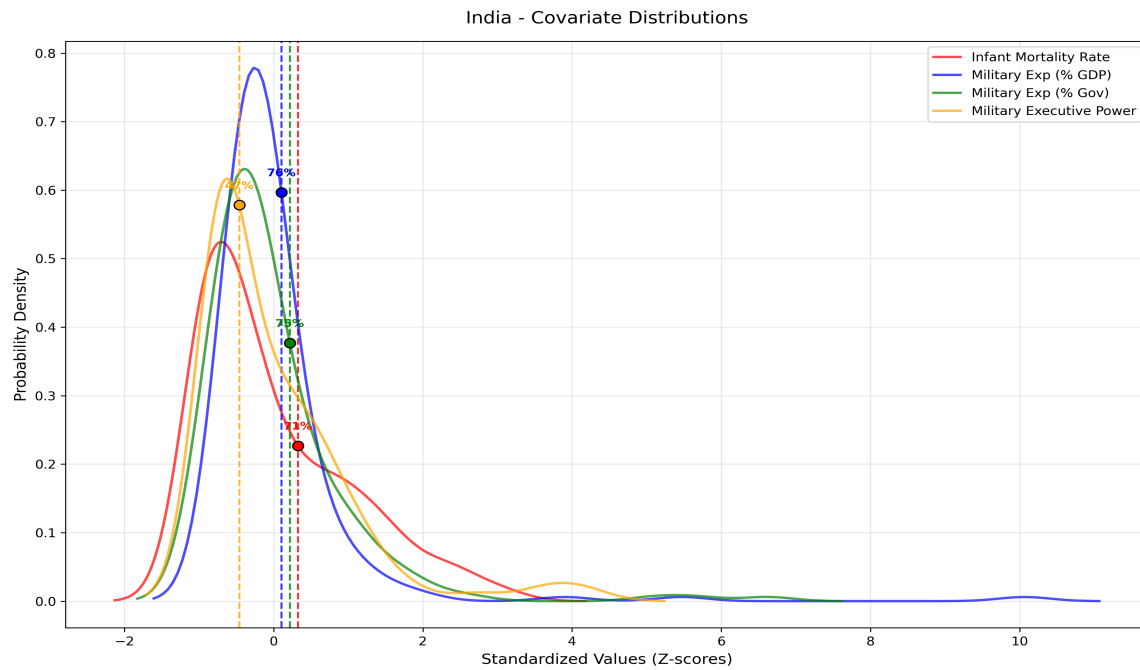

This figure shows the historical trend for September fatalities over the past 5 years, with our forecast for September 2026 highlighted. The other forecast months are shown for additional context. Global and cohort averages provide comparative context.

Our forecast for September 2026 (19 fatalities) is moderately lower than the 5-year historical average (26 fatalities).

Section 2

This figure shows where the target country sits within the global distribution for key covariates. Each colored curve represents the probability density of a covariate across all countries, with the target country's position marked by a vertical line.

Country profile: Infant Mortality Rate: high (71th percentile); Military Exp (% GDP): high (76th percentile); Military Exp (% Gov): high (75th percentile); Military Executive Power: moderate (47th percentile).

Section 3

This figure shows the global distribution of conflict forecasts for September 2026, with countries positioned by their probability of experiencing ≥ 25 fatalities (x-axis, symlog scale) and predicted fatalities (y-axis, symlog scale). The target country is highlighted with a prominent marker.

For September 2026, India is forecasted with 0.158 probability of ≥ 25 fatalities (91th percentile) and 19.3 predicted fatalities (91th percentile). Risk category: Improbable conflict; Intensity category: 11-100.
