

Conflict Forecast: Yemen

Target Month: September 2026

Section 1

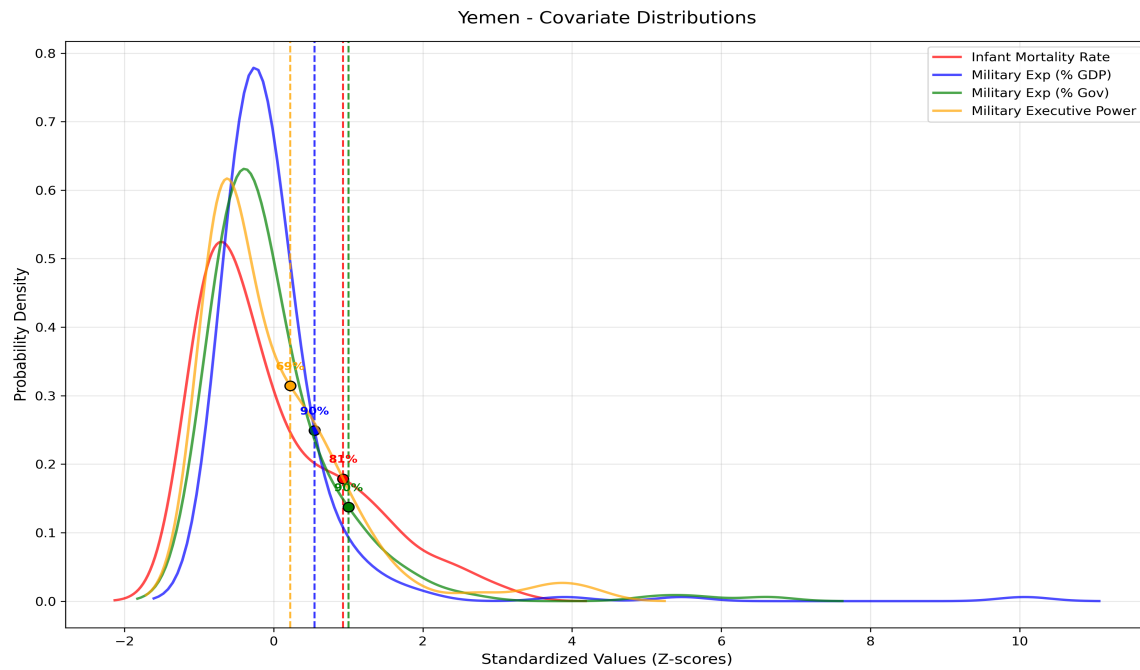

This figure shows the historical trend for September fatalities over the past 5 years, with our forecast for September 2026 highlighted. The other forecast months are shown for additional context. Global and cohort averages provide comparative context.

Our forecast for September 2026 (35 fatalities) is significantly lower than the 5-year historical average (354 fatalities).

Section 2

This figure shows where the target country sits within the global distribution for key covariates. Each colored curve represents the probability density of a covariate across all countries, with the target country's position marked by a vertical line.

Country profile: Infant Mortality Rate: very high (81th percentile); Military Exp (% GDP): very high (90th percentile); Military Exp (% Gov): very high (90th percentile); Military Executive Power: high (69th percentile).

Section 3

This figure shows the global distribution of conflict forecasts for September 2026, with countries positioned by their probability of experiencing ≥ 25 fatalities (x-axis, symlog scale) and predicted fatalities (y-axis, symlog scale). The target country is highlighted with a prominent marker.

For September 2026, Yemen is forecasted with 0.814 probability of ≥ 25 fatalities (94th percentile) and 35.1 predicted fatalities (94th percentile). Risk category: Probable conflict; Intensity category: 11-100.
