

Conflict Forecast: Niger

Target Month: March 2026

Section 1

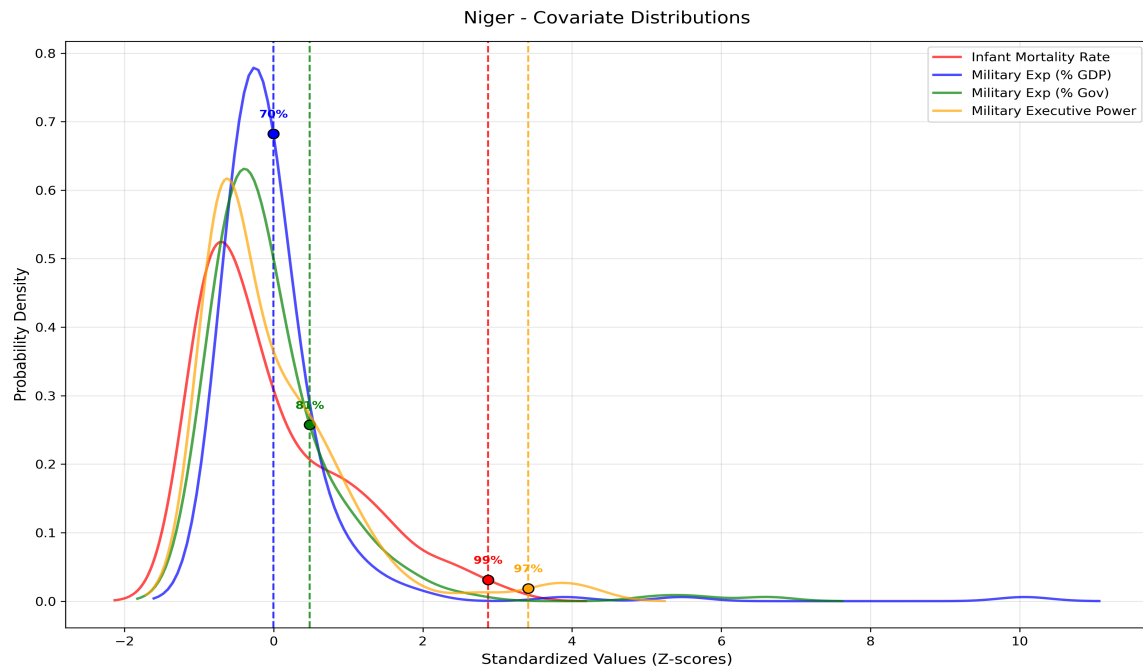

This figure shows the historical trend for March fatalities over the past 5 years, with our forecast for March 2026 highlighted. The other forecast months are shown for additional context. Global and cohort averages provide comparative context.

Our forecast for March 2026 (121 fatalities) is consistent with the 5-year historical average (114 fatalities).

Section 2

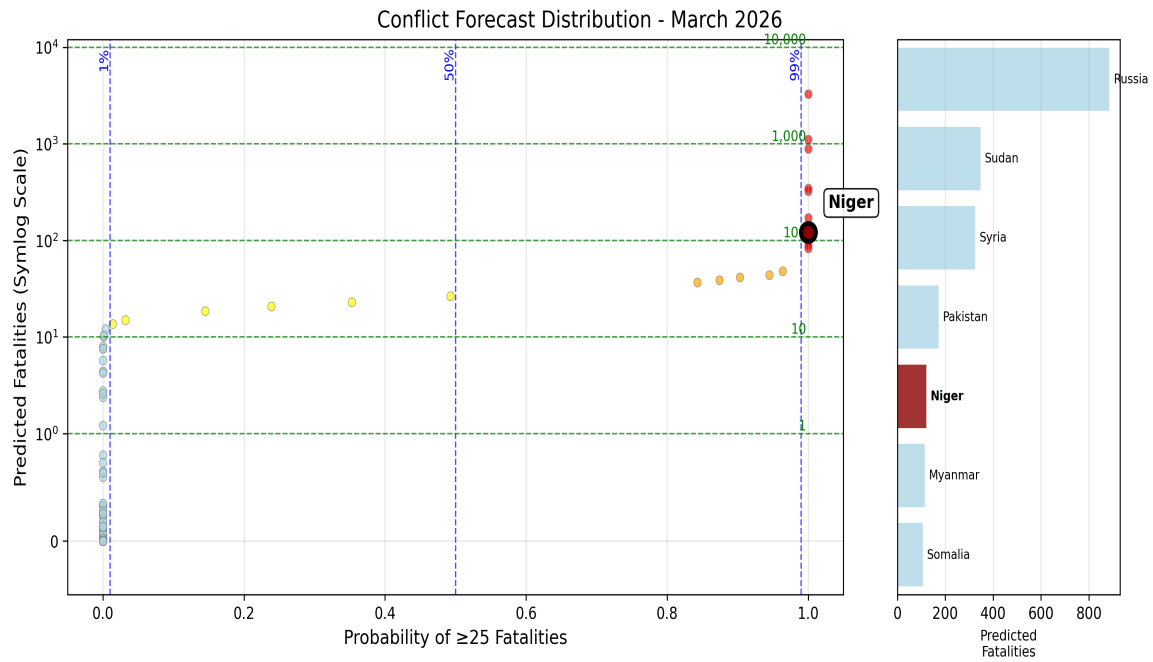

This figure shows where the target country sits within the global distribution for key covariates. Each colored curve represents the probability density of a covariate across all countries, with the target country's position marked by a vertical line.

Country profile: Infant Mortality Rate: very high (99th percentile); Military Exp (% GDP): high (70th percentile); Military Exp (% Gov): very high (81th percentile); Military Executive Power: very high (97th percentile).

Section 3

This figure shows the global distribution of conflict forecasts for March 2026, with countries positioned by their probability of experiencing ≥ 25 fatalities (x-axis) and predicted fatalities (y-axis, symlog scale). The target country is highlighted with a prominent marker.

For March 2026, Niger is forecasted with 1.000 probability of ≥ 25 fatalities (100th percentile) and 121.2 predicted fatalities (97th percentile). Risk category: Near-certain conflict; Intensity category: 101-1,000.
