

# Conflict Forecast: Congo, DRC

Target Month: September 2026

## Section 1

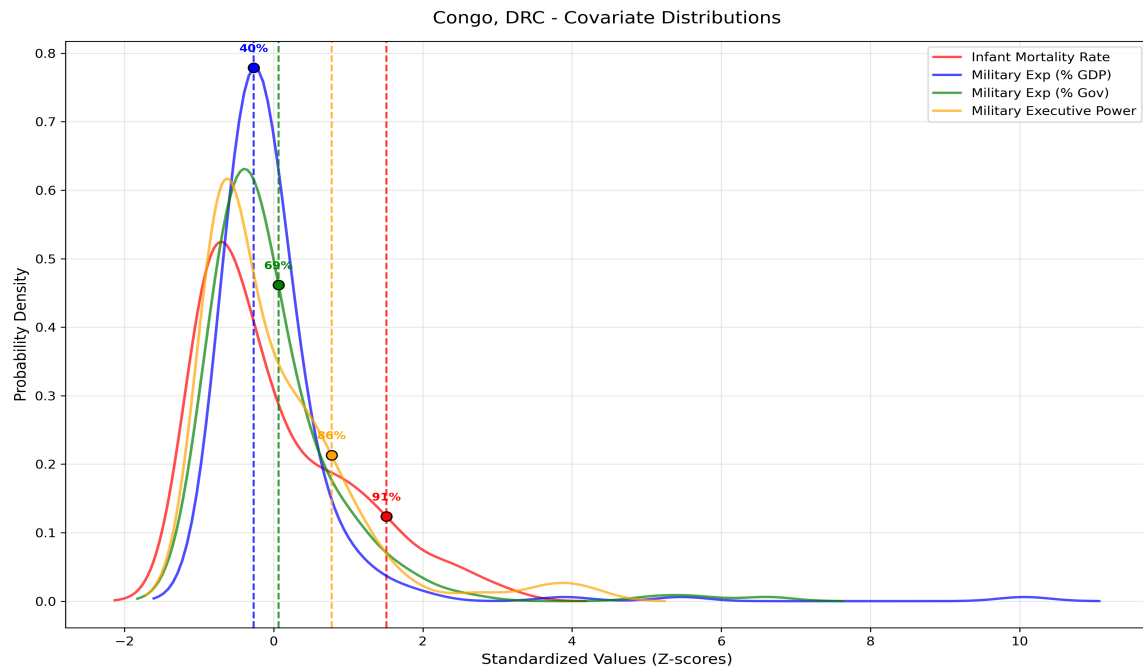

This figure shows the historical trend for September fatalities over the past 5 years, with our forecast for September 2026 highlighted. The other forecast months are shown for additional context. Global and cohort averages provide comparative context.

Our forecast for September 2026 (31 fatalities) is significantly lower than the 5-year historical average (337 fatalities).

## Section 2

This figure shows where the target country sits within the global distribution for key covariates. Each colored curve represents the probability density of a covariate across all countries, with the target country's position marked by a vertical line.

Country profile: Infant Mortality Rate: very high (91th percentile); Military Exp (% GDP): moderate (40th percentile); Military Exp (% Gov): high (69th percentile); Military Executive Power: very high (86th percentile).

### Section 3

This figure shows the global distribution of conflict forecasts for September 2026, with countries positioned by their probability of experiencing  $\geq 25$  fatalities (x-axis) and predicted fatalities (y-axis, symlog scale). The target country is highlighted with a prominent marker.

For September 2026, Congo, DRC is forecasted with 0.723 probability of  $\geq 25$  fatalities (93th percentile) and 31.7 predicted fatalities (93th percentile). Risk category: Probable conflict; Intensity category: 11-100.
