

# Conflict Forecast: Burundi

Target Month: December 2025

## Section 1

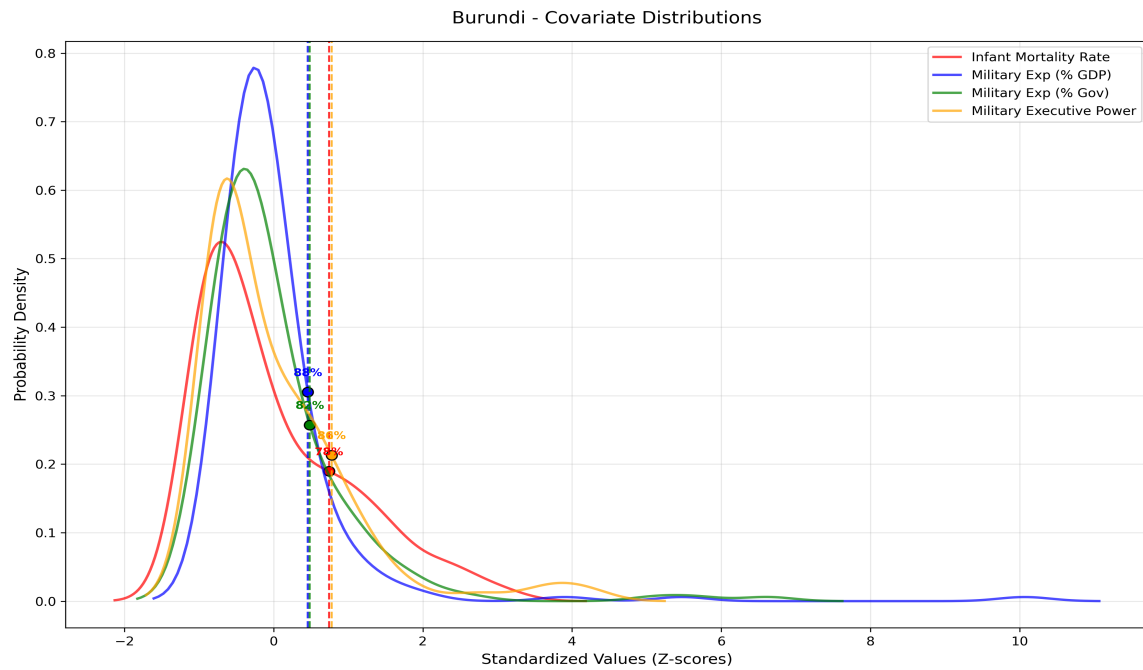

This figure shows the historical trend for December fatalities over the past 5 years, with our forecast for December 2025 highlighted. The other forecast months are shown for additional context. Global and cohort averages provide comparative context.

Our forecast for December 2025 (0 fatalities) is significantly lower than the 5-year historical average (9 fatalities).

## Section 2

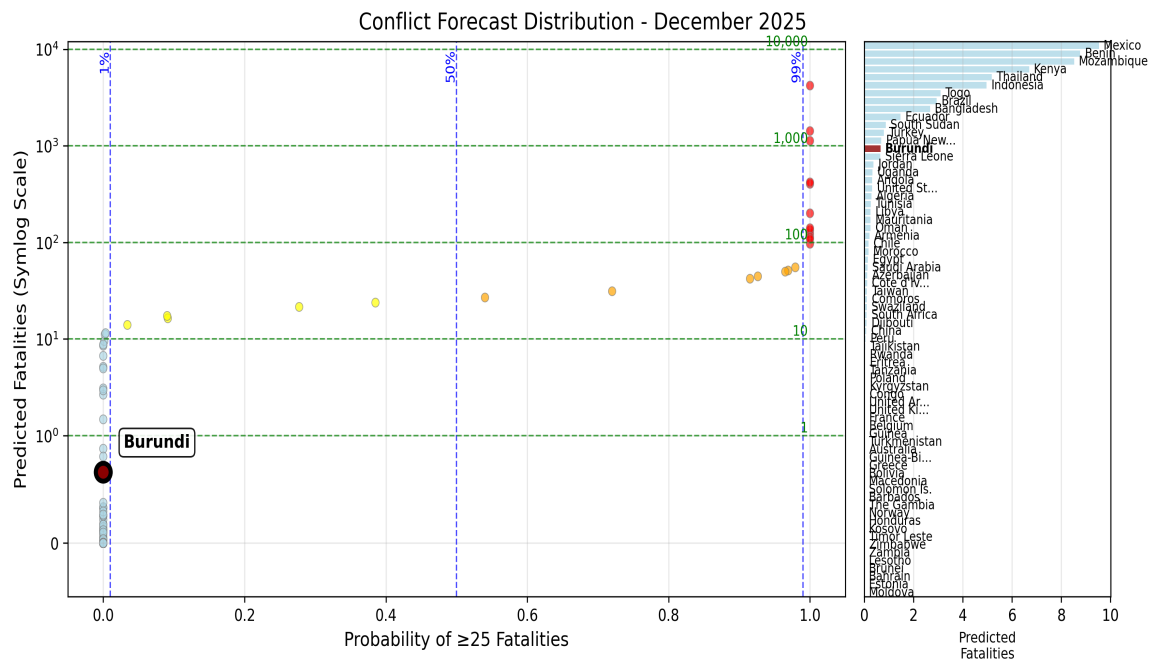

This figure shows where the target country sits within the global distribution for key covariates. Each colored curve represents the probability density of a covariate across all countries, with the target country's position marked by a vertical line.

Country profile: Infant Mortality Rate: high (78th percentile); Military Exp (% GDP): very high (88th percentile); Military Exp (% Gov): very high (82th percentile); Military Executive Power: very high (86th percentile).

### Section 3

This figure shows the global distribution of conflict forecasts for December 2025, with countries positioned by their probability of experiencing  $\geq 25$  fatalities (x-axis) and predicted fatalities (y-axis, symlog scale). The target country is highlighted with a prominent marker.

For December 2025, Burundi is forecasted with 0.000 probability of  $\geq 25$  fatalities (86th percentile) and 0.7 predicted fatalities (80th percentile). Risk category: Near-certain no conflict; Intensity category: 1-10.
