# Conflict Forecast: Myanmar

## Target Month: March 2026

Section 1

This figure shows the historical trend for March fatalities over the past 5 years, with our forecast for March 2026 highlighted. The other forecast months are shown for additional context. Global and cohort averages provide comparative context.

Myanmar - Monthly Fatalities Trend (Emphasis: March)

Our forecast for March 2026 (114 fatalities) is significantly lower than the 5-year historical average (260 fatalities).
Section 2

This figure shows where the target country sits within the global distribution for key covariates. Each colored curve represents the probability density of a covariate across all countries, with the target country's position marked by a vertical line.

Figure title: Myanmar - Covariate Distributions

Country profile: Infant Mortality Rate: very high (80th percentile); Military Exp (% GDP): very high (88th percentile); Military Exp (% Gov): very high (97th percentile); Military Executive Power: very high (98th percentile).

Section 3

This figure shows the global distribution of conflict forecasts for March 2026, with countries positioned by their probability of experiencing ≥25 fatalities (x-axis) and predicted fatalities (y-axis, symlog scale). The target country is highlighted with a prominent marker.

Conflict Forecast Distribution - March 2026

For March 2026, Myanmar is forecasted with 1.000 probability of ≥25 fatalities (100th percentile) and 114.2 predicted fatalities (96th percentile). Risk category: Near-certain conflict; Intensity category: 101-1,000.
